

Capricorn Pipework Pressure Test

The red and blue plugs for leak proof test ensure correct sealing in domestic water and heating systems working with a maximum working pressure of 116 psi. Pipework pressure tests plugs are used to seal tubes and various types of installation fittings and allow for the detection of faults in the installation. The material, from which the corks are made, is characterised by durability and resistance to high pressure and temperature.

Capricorn plugs for leak proof tests are made of polypropylene blue / red concentrate, polypropylene with high resistance to crushing, breaking and cracking. The plugs are safe in use, non-toxic, resistant to acids, alkalis, salts and to most of the organic substances.
