

**SAFETY VALVE WITH PLATE 1/2"**

**Item number 167**

**CHARACTERISTICS**

**Threads:** Male-Female ISO 228 (equivalent to DIN EN ISO 228 and BS EN ISO 228).

**Body:** Brass

**Sizes:** from 1/2"

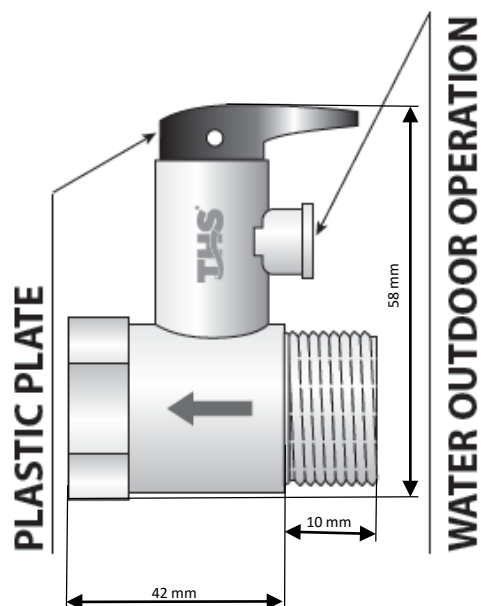

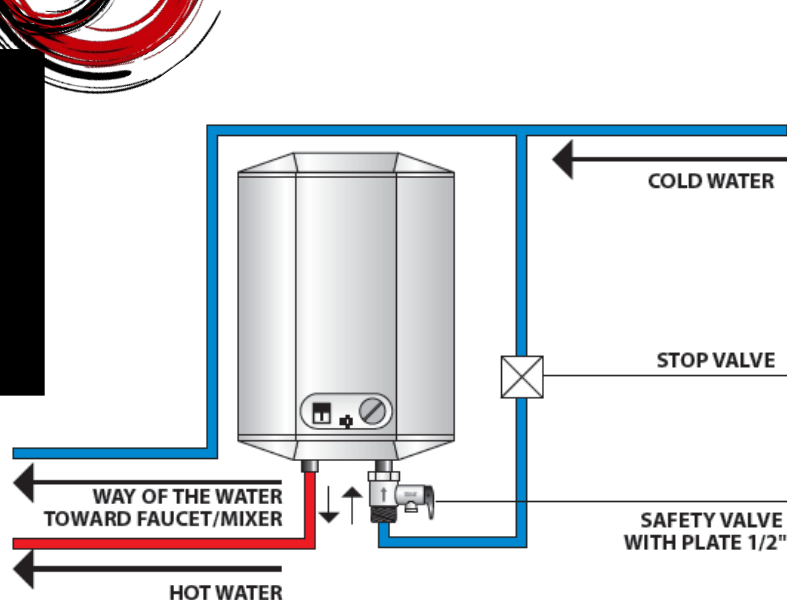

**Setup pressure:** 8 bar.

**APPLICATION:**

The safety valve is a mechanical high-pressure protection.

During the water heating, the water expands and at a higher temperature expansion the valve opens to compensate for the pressure. The safety valve is intended to open at an excessively high pressure in the boiler as to relieve the pressure. The valve is mechanical against high pressure.
